Comments

Extensive history of service at Ken Browne Motors incl. engine rebuild in 2012.

Odometer 79,508 mi.
 Mileage 79508 mi.

P2

Condition

General

We understand that the owner requires an appraisal for insurance purposes. This vehicle is currently in the middle of a complete restoration. At the moment the body has been completely refinished and is ready to be polished and reassembled. All the interior is out of the vehicle except for the frame of the divider.

Interior

The interior is currently out of the car to facilitate the restoration, it will be restored as the final part of the project.

Body and Paint

The paint finish is a new repaint currently ready for wet sanding and polishing. All the body shell panels are in excellent corrosion and damage free condition. The grill tank is in good solid condition, the soldered joints still have good integrity, there are scratches that can be polished out. The mascot is the kneeling Flying Lady motif in very good damage free condition. The flutes in the grill are in very good condition and require only polishing to bring back to original. Both front fenders are in very clean damage free condition. The hood panels are in very clean damage free condition. The windshield frame is very clean. All four door skins are in very clean corrosion and damage free condition. Both rear quarter panels and the integrated fenders are in excellent damage free condition. The chassis frame and the outriggers have been very well preserved, they are in clean condition with light surface corrosion where the undercoat has worn.

Mechanical

The car has undergone an extensive mechanical restoration at Ken Browne Motors in Toronto in 2012. This work included an engine rebuild, new exhaust system, king pins, fuel pump, fuel tank and gas lines, water pump, a complete brake system rebuild, thermostat and air filter. The car is fitted with standard steel rims with bias ply white wall tires.

P3

Glass

The windshield, rear window and side glass is in good crack free condition.

Valuation

This car is in mid restoration. All the work is being carried out by classic car specialists. The Rolls-Royce Limousine from the post war period remains a practical driving vehicle and has a strong collector following.

We recommend that you insure your vehicle employing a 19A form appended to your insurance policy.

We value this vehicle in the current retail market at \$90,500.00 CDN. including taxes.

**Maurice Bramhall
President.**

Description

Absolutely stunning Automatic 4 Door Sports Saloon with a Phantom IV Straight 8 engine. Only Rolls Royce Cars built for Royalty featured the straight 8 in the larger Phantom bodies as opposed to the standard straight 6 engine making this a very rare car. This car is also unusual in that it doesn't have the division for the rear passengers as well, making it a bit more of a personal conveyance as opposed to a limousine. The car also features power steering and air. The coach built by Freestone & Webb. A very nice restoration! Don't miss your opportunity to own a truly unique and rare Silver Wraith. Car is from an extensive collection of similar quality Rolls Royce cars. Please inquire on this and other available cars by calling Fred at (781)799-0689.

Description

Chassis number WGC7 Registration number LGT499 A beautiful Hooper non division car. It comes to us from the estate of Sir James Caylor. He had a spectacular collection of Rolls Royce motor cars, but preferred this to all the others, using it the most. The car has recently been painted in a spectacular two tone silver & indigo blue colour scheme & looks fantastic. The car has been maintained for many years without regard to expense & is a really really fine example. The interior is light coffee coloured leather with matching carpets. Superb highly figured Walnut adorns the door tops & dash boards, again in lovely condition. Beins taken care of to the last detail. The car has covered just 121,000 miles from new. It benefits from heating, air conditioning fitted. The engine bay is very tidy with the engine running in smooth silence & pulling strongly in all gears. Oil pressure is excellent & the temperature stays normal. A tool kit is located in a side out drawer beneath the dash board. Coachwork is by Hooper with the usual boyd reproach Hooper quality. Door joints are perfect & close with a train carriage door feel. A chrome strip runs along the waist line of the car. This is a way way above average wraith & is well worth a look if you are looking for a Silver Wraith in impeccable mechanical condition.

Description

Chassis Number: PLW94 Registration number: BLK118 Large imposing, this Wraith has covered just 62,000 miles from new. Originally supplied to Sheikh Ghazi Al Thani of Trucial commodities Corp, the car shipped new to the Persian Gulf was fitted with air conditioning which it has to this day. It is featured on the front page of Graham Robson's Collector's Guide (The Rolls-Royce and Bentley Volume 2) Coachbuilt models 1943-1985 Book). The car spent many many years in the ownership of an aristocratic Spanish family who kept the car garaged at their finca outside Madrid. It was scarcely used during this time for family wedding & odd formal occasions doing less than 1000 miles per year, yet being serviced properly each year looked
